

Purpose

Follow these easy steps to enable your BrainPOP quizzes to run with ActivExpression or ActiVote.

Hardware Set-Up

1. Connect the ActivHub and register ActivExpressions.

For directions on registering the ActivExpressions, click on the following link:

<http://www.dekalb.k12.ga.us/~it/activclassroom/PDFs/39a.%20Voting%20Browser%20Registration.pdf>

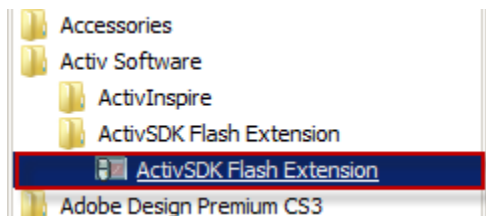

2. Check that you are running the Flash Bridge.

Look at the bottom right corner of the screen (near the clock) for the icon that looks like a cutoff ActivExpression.

If you do not see the Flash Bridge icon, manually start it.

3. Click on the **Start Menu** → **All Programs** folder → **Activ Software** folder → **ActivSDK Flash Extension** → **ActivSDK Extension**

Check to see if the Flash Bridge icon has appeared bottom right corner.

Administering the Quiz

4. Go to the BrainPOP website: www.brainpop.com

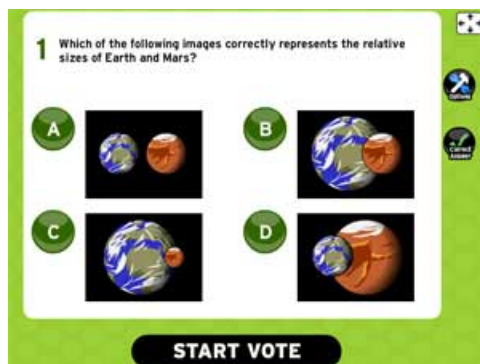

5. Navigate to the desired topic.

6. Click on the **Quiz** button.

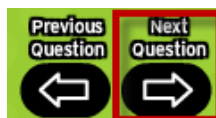

7. Click on the **ActivExpression Quiz** button.

8. Select your options and click **Start Vote**.

9. Once all students have voted, the options to move to the next question will appear in the bottom right corner.

Click **Next Question**.

10. If necessary, you can always end the voting before all participants have answered by clicking the **Stop** button.

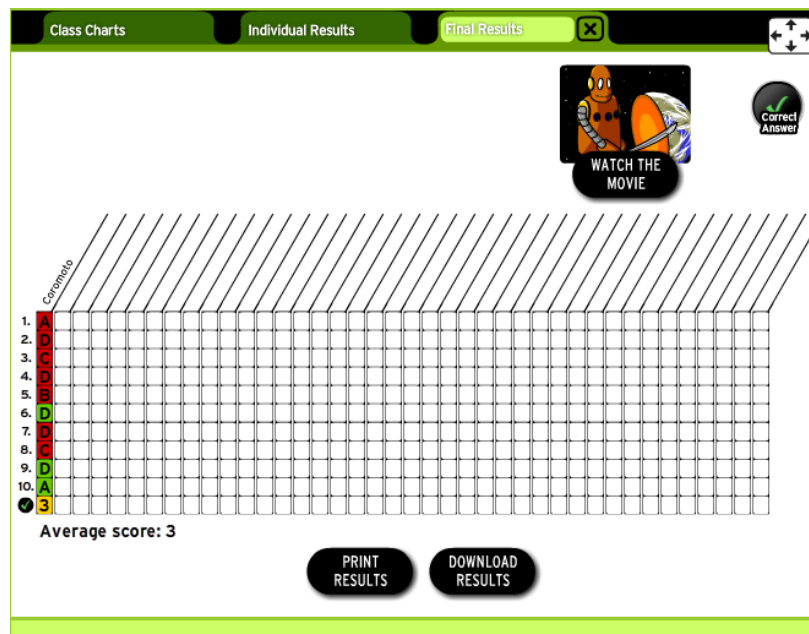

ActivExpressions and BrainPOP

BrainPOP quizzes have 10 questions. Once you have completed all questions, you will no longer be able to advance or click Next Question.

11. Click the **Final Results** tab (bottom right corner) to see responses from all students in a chart.

12. Click the **X** to close this window when finished.
